

Salmon & Co., 1880

Dear respectable Sir!

I am very much indebted to you, and it is with a great deal of pleasure that I translate several articles in the History for which, permission I am greatly obliged to you.

I am also, preparing a volume on the History of America & will already present a monograph of the same name & forward some days ago to your library. I am very scarce of specimens, however I am desirous of the Queen's insignia and I am in a great hurry to provide them, wishing to publish this small pamphlet on occasion of my getting private notice. Mr. Watson has collected many much in forwarding me many specimens of which perhaps I am indebted to you also on this occasion & thank you for the same, and I am very glad to be able to dispose of some of the Queen's insignia, in connection, in connection, please

to me in most attentive & generous manner
in this case would be, to kindly and promptly
return me you. I am very much interested about
synonymy of this group, I am curious and
necessarily I must know what accidents
for instance, *S. obtusiflorum* Hook. &
indophyllum & *humulosum* Dougl. etc
are? You & I decide myself to publish
my writing with some innovations, which
necessarily result having already revised
analyzed and described (in part) all the
new or species except some very rare
of the Cape of Good Hope, and some
etc

I am sure that you will endeavor
to offer an aid to a student and so my
most humble requests may obtain a
favorable result.

If you could, I am to receive a number
of *Acridium* plants most willingly I will
repay for you a Libanum a good set
of them, I address you reasonable price
of *Centinaria* (L.) I have issued this year,
though I fear that having already cited
many of them, I shall not be in the
case of, assisting with the plants if
desired.

Dr Watson who has been
very kind for me, will receive in the same
time a prospectus where I have described
my views on the distribution of the
American species of *Scirpus* with the

It is a plea that my work might prove
more useful to send home on such occasions
the opinions of men of the country who have
since many years immorally treated the
subject. I would have submitted my paper
to you but I feared to be unavailing, I had
never received letters from you, and I imagined
easily that time is so precious to
very learned men to spare it unworthily on
subjects extraneous to their business; it is
superfluous ^{to say} that whenever you would be
disposed to give me your opinion on the
matter I would feel greatly honored and
obliged to you

With my respects to you, accept
for my most sincere respects and believe
me yours very truly and

M. de S. S. S.
bonser, in the Barberian
Foot Gardens Palermo

to Professor G. G. G.
Cambridge
(And: W. S. Amherst)
